

Obtaining a HotView Pro License Key

The following are the methods one can use to obtain a HotView Pro license key:

1. Firetide HotView Pro keys are sold via Firetide distribution channels to integrators. Any questions by an integrator in regards to a new or already issued key(s) should be addressed to your Firetide distributor.
2. End users must contact a product integrator in regards to purchasing a new key(s) or to inquire about an already issued key(s).
3. Attending Firetide certified in-class training comes with a 10 node Management key that can be made permanent. This key is for the sole-use of the student and cannot be transferred to a customer or a separate individual.
