Resetting a HotPort Mesh Node to its Default Settings via FT Shell

Process

1. Open the intended mesh via HotView
2. Select the node you wish to reset and right-click on this mesh node
3. choose **Advanced Tools** and **Telnet Shell**
4. Enter the following login credentials: *ftusr* for username and *ftu5r* for the password
5. From the ft shell, do the following:
    a. Enter *conf*
    b. Then *node*
    c. Then *reset*
    d. Answer the questions when prompted, and enter *reboot* to complete the reset process.
